INVIGOR
HYBRID CANOLA
InVigor L233P

Canola seed hybrid performance comparison.

InVigor® hybrid canola from BASF continues to lead yield rankings in field trials across the country. With consistently strong yield potential and exciting new traits to help improve harvestability, InVigor hybrid canola gives you the confidence to grow more.

InVigor L233P

InVigor L233P has been grown on more acres than any other InVigor canola hybrid in US spring canola acres. Featuring patented Pod Shatter Reduction technology, this early-maturing, high-yielding hybrid provides the harvest flexibility you can count on.

	Yield	108.8% of the checks (InVigor 5440 and Pioneer® 45H20) in 2014 & 2015 WCC/RRC ¹ trials
	Traits	Patented Pod Shatter Reduction technology
	Growing Zones	All growing areas in the U.S. spring canola market
	Standability	Strong
	Maturity	3 1/2 days earlier than InVigor L345PC
	Blackleg	R – Blackleg resistant

*Always follow label directions and S.T.O.P. application guidelines when applying Liberty® herbicide.

Please note: Maturity and standability are based on performance ratings and data compiled from several InVigor internal trials over multiple years.

Results may vary on your farm due to environmental factors and preferred management practices.

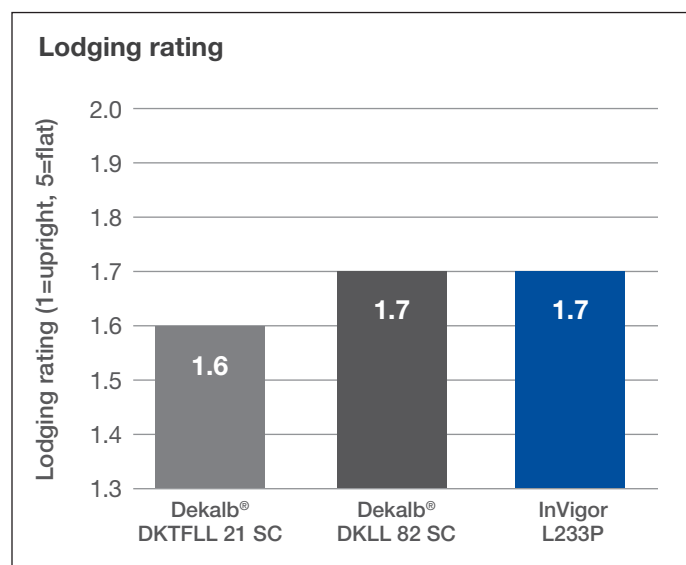

¹ Western Canadian Canola/Rapeseed Recommending Committee.

Straight Cut and Swathed Trials InVigor L233P vs. Competitors

BASF conducts large plot replicated canola trials across the U.S. spring canola growing area. These unique trials are conducted with grower cooperators. InVigor L233P yielded an average of 5% more than Dekalb® DKTFL 21 SC and 8% more than Dekalb® DKLL 82 SC across 9 InVigor USA DSTs in 2020.

Results November 3, 2020.

Protect your investment with outstanding weed control.

InVigor hybrids are bred with the LibertyLink® trait for built-in tolerance to Liberty herbicide. This fast-acting control allows growers to rotate non-selective herbicide systems and effectively manage tough-to-control weeds.
